

CAST IRON GRID LIFTER

CAST IRON GRID LIFTER

The Cast Iron Grid Lifter is a clever tool that makes it easy to lift heavy grids without dirtying your hands. Lower the grid lifter, rotate a quarter of a turn, clamp and lift.

Lifting the hot and heavy Cast Iron Grid of your Big Green Egg, perhaps to place or remove the convEGGtor, is a hot job. However, the handy Cast Iron Grid Lifter will quickly take care of it for you. The plate under the handle of the Cast Iron Grid Lifter protects your hands against any rising hot air.

The Cast Iron Grid Lifter is not suitable for the Cast Iron Grid of the Big Green Egg Mini.
