

# ACACIA WOOD EGG MATES®

Big Green Egg's new Acacia Wood EGG Mates are a wonderful accessory for your Big Green Egg. The handy side tables for your ingredients and tools are made of sustainably harvested acacia wood. This hardwood with striking markings is predominantly used for high-end furniture. Easy to fold out and fold down, and heat-resistant too. Fabulous!

The Acacia Wood EGG Mates are supplied with Tool-hooks. The pin and hole connections are strong and durable to prevent expansion or contraction. In addition, the wafer-thin layer of oil protects the acacia wood from UV light so that it stays colourfast (and matches your other acacia accessories). Just fold it out!

Clean as needed with a mild detergent and damp, non-abrasive cloth.

Exclusive Big Green Egg design
