

QUICK-READ THERMOMETER

Officially it is called the Big Green Egg Quick-Read Digital Food Thermometer. Which pretty much says it all. In a few seconds, it digitally reads the temperature of your leg of lamb or stuffed chicken. Accurate to the degree (up to 300°C!). Handy pocket size, and the handle serves as a storage case.

The Quick-Read Digital Food Thermometer from Big Green Egg is small and compact. Keep it at hand so that you can quickly check whether your roast is done. It switches off automatically after 5 minutes to save the batteries (which are included for your convenience).

Item code: 120793
